BIOGASMAX training material

Biogasmax Training

Name
Organisation

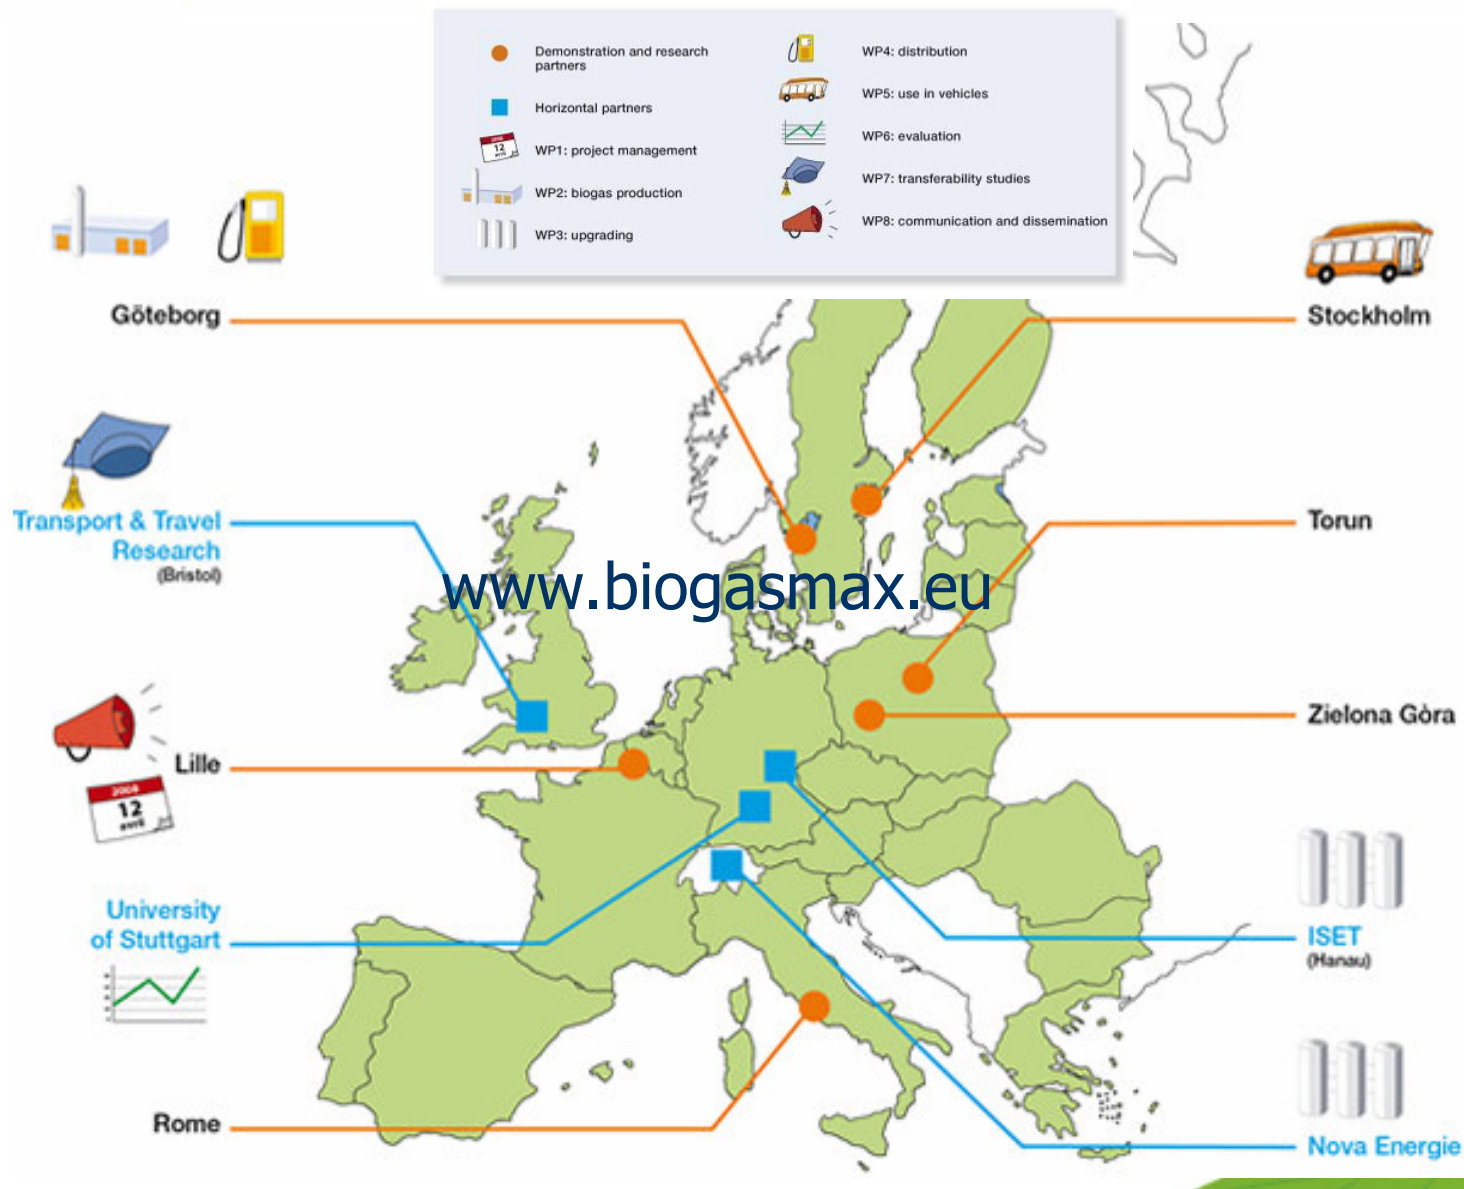

Aim of BIOGASMAX

To support the European Community in reducing its dependency on oil and reducing GHG emissions by providing knowledge about more efficient production, distribution and use of biogas (upgraded to biomethane) in the transport sector generated from a wide variety of feedstock available in Europe.

The Consortium

Biomethane Decision Guide

- Carried out an analysis of decision criteria that led decision makers to implement (or not) biomethane as a vehicle fuel in their community, municipality or region.
- Information has been drawn from experiences of project partners and other communities and the energy, ecological, economic, social and political aspects are outlined.

Biomethane Decision Guide

- Explains all aspects of biomethane decision, including practical examples
- Aims to help other organisations decide if biomethane implementation is possible and the steps to take
